OBJECTIVE

Strong in design and integration with initiative and problem-solving skills. Proficient in Core Java, JDBC, Hibernate, Spring Boot, and web technologies. Passionate about developing and implementing innovative projects. Committed to staying updated with emerging technologies and continuously enhancing technical expertise. Looking forward to starting my career with a company driven by innovation and growth.

INTERNSHIP

Java Developer Intern

JSpiders, Bangalore — Jun 2024 – Apr 2025

- Assisted in developing and debugging web applications using Java and Spring Boot.
- Worked with JSP, Servlets, and JDBC for backend module enhancements.
- Collaborated with the team to improve UI components using HTML, CSS, and JavaScript.
- Tech Stack: Java, Spring Boot, JSP, Servlets, HTML, CSS, JavaScript, MySQL

CERTIFICATES

Java Full Stack Development — JSpiders, Bangalore (Jul 2024 – Apr 2025)

C Programming & SQL — Skillrack

SKILLS

Programming Languages: Core Java

Web Technologies: HTML, CSS, JavaScript

Database: Oracle SQL

Persistence & ORM: JDBC, Hibernate

Server-Side Technologies: JSP, Servlet

Frameworks: Spring MVC, Spring Boot

Development Tools: Eclipse, Visual Studio Code, GitHub

PERSONAL PROJECTS

Village Support Portal (2025)

- Developed a web-based portal to allow village residents to submit service requests, report issues, and track the status of their applications.
- Created the frontend using HTML, CSS, and JavaScript, ensuring a simple and user-friendly interface.
- Implemented the backend using Spring MVC, applying MVC architecture for structured request handling and smooth interaction between the client and server.
- Integrated Spring JDBC / Hibernate with MySQL to store and manage user and admin data efficiently.
- **Tech Stack:** HTML, CSS, JavaScript, Spring MVC, Spring JDBC/Hibernate, MySQL

Employee Management System (Dec 2024)

- Designed and implemented an **Employee Management System** to store and manage employee data.
- Developed the frontend using HTML and CSS, and the backend using JSP and Servlets to enable seamless data processing between the client and server.
- **Tech Stack:** HTML, CSS, JSP, Servlet

Food Ordering Application (Front End) (2023)

- Developed a responsive web application for a food ordering system using HTML, CSS, and JavaScript.
- Designed an intuitive interface to enhance user experience across multiple devices.
- **Tech Stack:** HTML, CSS, JavaScript

COPD Prediction Using Machine Learning (2023)

- Implemented a predictive model to diagnose **Chronic Obstructive Pulmonary Disease (COPD)** using advanced machine learning algorithms.
- Aimed to facilitate early detection and improve patient outcomes by accurately identifying individuals at risk.
- **Tech Stack:** Python, Machine Learning

EDUCATION

B.E. Computer Science and Engineering

Karpagam College of Engineering, Coimbatore — 2020 – 2024 | **CGPA: 8.84**

Senior Secondary (XII), Computer Science

Dhanalakshmi Srinivasan Hr. Sec. School, Perambalur — 2019 – 2020 | **76%**

Secondary (X)

Nehru Higher Secondary School, Perambalur — 2017 – 2018 | **83%**

STRENGTHS

- Problem-Solving
- Quick Learner
- Team Collaboration
- Time Management
- Adaptability
